

VISITING INFORMATION

Naas General Hospital

Visiting restrictions continue at Naas General Hospital, visiting can be arranged in advance with the Ward Manager or the Senior Nurse in Charge.

The aim of current visiting restrictions is to prevent the spread of infection, this may result in family and friends not being able to see their loved ones during their hospital stay. Due to staff prioritising patient care it is not possible for staff to take phone calls from multiple family members throughout the day.

The hospital asks that:

- One family member be nominated as the 'Primary Contact' for their loved one on admission
- The Primary Contact can contact the ward between the hours of 3 - 5 pm daily

We encourage families and friends to keep in touch with their loved ones by the patient's own phone. For patients who lack the ability to use their mobile phone, we will endeavour to phone the patient's "Primary Contact" regularly.

Or through the '**Sending Love**' link available on the hospital website:
